SUMMARY

As a soon-to-be engineering graduate from IMT Nord Europe, I have a strong interest in Artificial Intelligence, Data Science, and Optimization. Highly motivated, curious, and adaptable with excellent problem-solving skills. Seeking my first position as a **Data Scientist** or **AI/ML Engineer**.

EXPERIENCE

Data Analyst / Scientist – Procurement Buyer

Sep 2025 – Mar 2026

COLAS (BOUYGUES Group)

Paris, France

- Created and maintained Power BI dashboards using Microsoft SQL Server Management Studio
- Cleaned and preprocessed data, trained classifiers using ML, neural networks, and LLMs in Python
- Applied Operations Research and Optimization to assignment problems in Calls for Tenders

PROJECTS

Churn Rate Prediction API

Mar – Apr 2026

<https://github.com/Ryqn0/Customer-Churn-S6E3-Challenge-Kaggle-MLOPS>

MLOPS

- Created a prediction API for a Kaggle competition, containerized and deployable on Cloud Services
- Developed a training, inference, testing, API, and CI/CD pipeline; Ensemble Learning via Voting Classifier with XGBoost, LightGBM, and CatBoost estimators
- Tools: VS Code, Jupyter Notebook, Pandas, Matplotlib, Seaborn, XGBoost, LightGBM, CatBoost, Scikit-learn, Great Expectations, MLFlow, FastAPI, Pydantic, Gradio, Pytest, Docker, GitHub Actions, Google Artifact Registry, Cloud Run

Supplier Selection Optimization

Dec 2025 – Jan 2026

Operations Research

Python, PuLP, OR-Tools

- Developed a generalizable model for calls for tenders with year-end discount systems
- Created Python notebooks processing Excel files to return optimal scenarios
- Achieved 0.5–1% cost savings on €10M tenders using heuristics and OR

Flexible Multi-Class Classification of After-Sales Comments

Nov 2025

LLM Fine-Tuning

Python, Transformers, Qwen

- Fine-tuned an open-source LLM to summarize and classify after-sales service comments
- Used generative AI for data augmentation and label annotation
- Applied Q-LoRA technique with 4-bit quantization on Qwen2.5-0.5b

EDUCATION

IMT Nord Europe

Douai, France

Engineering Degree, Computer Science Specialization

Sep 2022 – Mar 2026

- Courses: Numerical Analysis, Probability, Statistics, Optimization, Machine Learning, Databases

Shanghai Jiao Tong University

Shanghai, China

Exchange Program, Data Science Specialization

Sep 2024 – Jun 2025

- Courses: Data Science, Machine Learning, Deep Learning, Data Structures, Mandarin Chinese (HSK5)

Lycée Buffon

Paris, France

Preparatory Classes for Grandes Écoles (PSI)

Sep 2021 – Jun 2022

Lycée Fénélon

Paris, France

Preparatory Classes for Grandes Écoles (PCSI)

Sep 2020 – Jun 2021

SKILLS

Programming : Python, SQL, C++, Java, C

Languages : French (native), English (fluent), Mandarin Chinese (B2)

Deep Learning : TensorFlow, PyTorch, Keras, Transformers, Hugging Face

Data Science : Pandas, NumPy, Scikit-learn, XGBoost, LightGBM, MLFlow, Optuna, FastAPI, Docker, Great Expectations

Cloud & CI/CD : Google Cloud Platform, Google Artifact Registry, Cloud Run, GitHub, GitHub Actions

Optimization : PuLP, Gurobi, OR-Tools

Tools : Power BI, SQL Server, Databricks, Excel, PowerPoint

Soft Skills : Adaptability, Fast Learning, Problem-solving, Critical Thinking, Autonomy
