SUMMARY

As a soon-to-be engineering graduate from IMT Nord Europe, I have a strong interest in Artificial Intelligence, Data Science, MLOps, and Optimization. Highly motivated, curious, and adaptable with excellent problem-solving skills. Seeking my first position as a **Data Scientist, AI/ML Engineer** or **Data Engineer**.

EXPERIENCE

Data Analyst / Scientist – Procurement Buyer

COLAS (BOUYGUES Group)

Sep 2025 – Mar 2026

Paris, France

- Created and maintained Power BI dashboards using Microsoft SQL Server Management Studio
- Cleaned and preprocessed data, trained classifiers using ML, neural networks, and LLMs in Python
- Applied Operations Research and Optimization to assignment problems in Calls for Tenders

PROJECTS

Real-Time Bank Fraud Detection

github.com/Ryqn0/fraud-mlops

Apr – May 2026

End-to-End MLOps Pipeline on GCP

- Real-time streaming architecture: Pub/Sub → Cloud Run (FastAPI ingestion + inference) → BigQuery, with rolling-window feature engineering via SQL and LightGBM training with time-aware split to prevent label leakage
- Data drift monitoring (Kolmogorov-Smirnov test for continuous features, χ^2 for binary ones) with Cloud Monitoring alerts; CI/CD via GitHub Actions with 21 automated tests, automatic build and Cloud Run deployment on merge to main, AUC-PR as a measure metric.
- Production-shaped system delivered under a strict \$50 budget through serverless discipline (scale-to-zero, nightly teardown); 7 orchestrated GCP services (Pub/Sub, Cloud Run, BigQuery, GCS, Artifact Registry, Cloud Monitoring, IAM)
- Tools: Python, LightGBM, FastAPI, Pub/Sub, Cloud Run, BigQuery, MLflow, Evidently AI, Docker, GitHub Actions, GCS, Artifact Registry, Cloud Monitoring, Pytest

Churn Rate Prediction API

github.com/Ryqn0/Customer-Churn-S6E3-Challenge-Kaggle-MLOPS

Mar – Apr 2026

Kaggle Competition, MLOps

- Created a prediction API for a Kaggle competition, containerized and deployable on Cloud Services
- Developed a training, inference, testing, API, and CI/CD pipeline; Ensemble Learning via Voting Classifier with XGBoost, LightGBM, and CatBoost estimators
- Tools: VS Code, Jupyter Notebook, Pandas, Matplotlib, Seaborn, XGBoost, LightGBM, CatBoost, Scikit-learn, Great Expectations, MLflow, FastAPI, Pydantic, Gradio, Pytest, Docker, GitHub Actions, Google Artifact Registry, Cloud Run

Supplier Selection Optimization

Operations Research

Dec 2025 – Jan 2026

Python, PuLP, OR-Tools

- Developed a generalizable model for calls for tenders with year-end discount systems
- Created Python notebooks processing Excel files to return optimal scenarios
- Achieved 0.5–1% cost savings on €10M tenders using heuristics and OR
- Tools: Python, PuLP, OR-Tools, Gurobi, Pandas, OpenPyXL

Flexible Multi-Class Classification of After-Sales Comments

LLM Fine-Tuning

Nov 2025

Python, Transformers, Qwen

- Fine-tuned an open-source LLM to summarize and classify after-sales service comments
- Used generative AI for data augmentation and label annotation
- Applied Q-LoRA (Quantized Low-Rank Adaptation) with 4-bit quantization on Qwen2.5-0.5b
- Tools: Python, Hugging Face Transformers, PEFT, bitsandbytes, PyTorch, Qwen2.5

EDUCATION

IMT Nord Europe

Engineering Degree, Computer Science Specialization

Douai, France

Sep 2022 – Mar 2026

- Courses: Numerical Analysis, Probability, Statistics, Optimization, Machine Learning, Databases

Shanghai Jiao Tong University

Exchange Program, Data Science Specialization

Shanghai, China

Sep 2024 – Jun 2025

- Courses: Data Science, Machine Learning, Deep Learning, Data Structures, Mandarin Chinese (HSK5)

Lycée Buffon

Preparatory Classes for Grandes Écoles (PSI)

Paris, France

Sep 2021 – Jun 2022

SKILLS

Programming : Python, SQL, C++, Java, C

Languages : French (native), English (fluent), Mandarin Chinese (B2)

Data Science / ML : Pandas, NumPy, Scikit-learn, XGBoost, LightGBM, CatBoost, Optuna, Great Expectations

Deep Learning / LLM : PyTorch, TensorFlow, Keras, Hugging Face Transformers, PEFT (LoRA/Q-LoRA), bitsandbytes

MLOps & Production : MLflow, FastAPI, Pydantic, Gradio, Docker, Pytest, Evidently AI, drift monitoring, model registry, A/B testing

Cloud & CI/CD : Google Cloud Platform (Cloud Run, Pub/Sub, BigQuery, GCS, Artifact Registry, Cloud Monitoring, IAM), GitHub Actions

Optimization : PuLP, Gurobi, OR-Tools

Data Tools : Power BI, SQL Server, Databricks, Excel, PowerPoint

Soft Skills : Adaptability, Fast Learning, Problem-solving, Critical Thinking, Autonomy
